

Plastic bottle shark

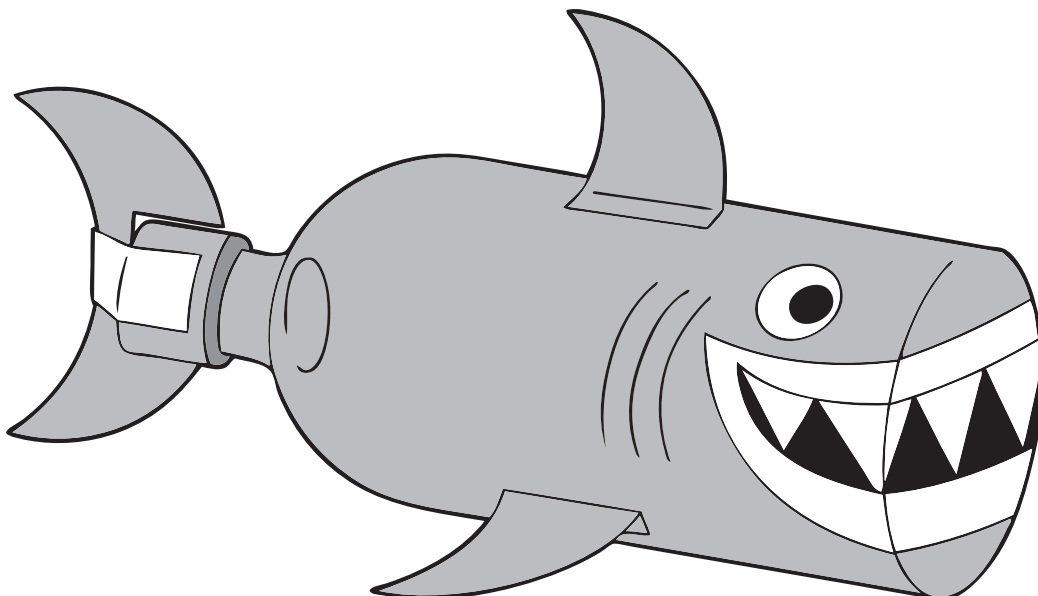

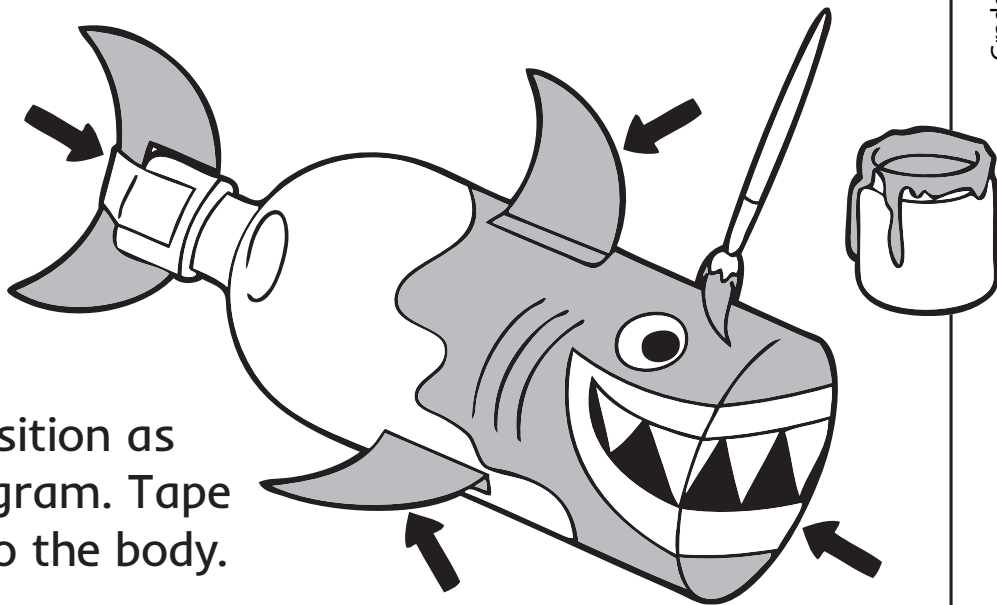

Name:

Let's make a shark. For this you will need: glue paste, sticky tape, a pair of safe scissors, grey paint, a paint brush, an empty plastic 2-litre bottle and the shark template.

Instructions

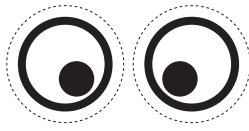

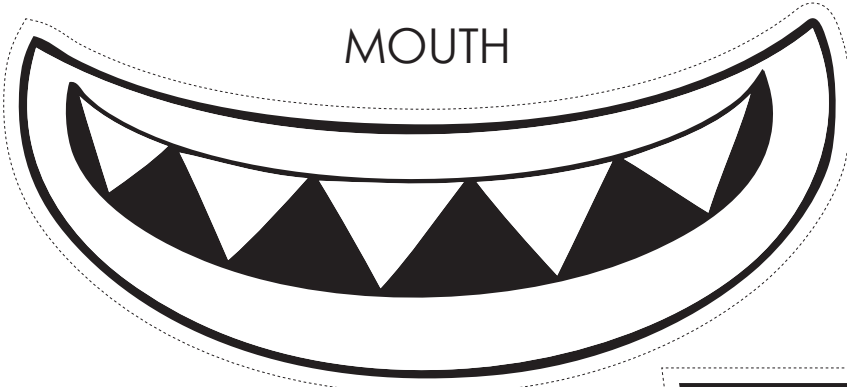

1. Make sure the empty plastic bottle is clean and dry and paint it grey.
2. Paste the template page onto stiff card and then paint the fins and tail pieces grey. Cut out the template pieces when they are dry and paste them in position as shown in the diagram. Tape the tail piece onto the body.
